# BECOMING A SUSTAINABLE ØRN

At ØRN we have a long-term commitment to being a truly sustainable business which is why we aim to ensure that every facet of our business has as little impact on the environment as possible, whilst at the same time protecting lives and sustaining livelihoods.

In order to fulfil our commitments we have launched **‘THE SUSTAINABILITY CONVERSION PROJECT’**. Through this we will evaluate all areas of our operation that impact negatively on the environment. This will enable us to develop the detail of our sustainability strategy.

## OUR ETHICAL & RESPONSIBLE WORKING PRACTICES

As a responsible manufacturer, we only partner with ethical and accountable producers who uphold and adhere to globally respected practices. This includes a zero tolerance to modern slavery and a commitment that our suppliers will not use involuntary, forced or trafficked labour nor hire any employee under the minimum age as established by law. We are proud to be a living wage employer which ensures that all employees aged 18 and over, including certain classes of contracted staff, are paid at least the living wage.

## ACCREDITATION

Our ambition is for the ØRN brand to become synonymous with outstanding quality, ethical working practices, industry leading innovation and long-term sustainability. And with our ISO accreditation, our customers can be assured that they will receive the highest quality service levels that adhere to stringent Quality, Health & Safety and Environmental guidelines.

As part of our commitment towards more sustainable working practices, ØRN has implemented a number of actions to reduce our impact on the planet and its resources:

	 <b>100% RECYCLED PACKAGING</b>			
We have reduced our carbon footprint by 30% annually, and aim to be carbon neutral by 2030.	All orders are shipped using cartons / bags made from 100% recycled material.	Any cardboard and plastic waste generated within our operation is recycled saving on landfill waste.	50% of our fleet of vehicles delivers low or zero emissions.	In our warehouse we use 100% electric powered MHE equipment and all lighting is low emission motion sensitive LED.

Certified by Control Union  
CU 1050913

### ØRN IS CERTIFIED TO THE GRS - GLOBAL RECYCLED STANDARD, WHICH VERIFIES RECYCLED CONTENT AND TRACKS IT FROM SOURCE TO THE FINAL PRODUCT.

As the demand for recycled product increases, ØRN has committed to an internationally recognised, independently verified certification process to ensure the integrity of its sustainable products.

Certification is a means to confirm that the levels of social and/or environmental performance claimed for a product are correct and verified by an external party.

Third party certification is considered one of the strongest ways to ensure the integrity of supply chain and sustainability claims. By using this system, an independent third party gives assurance that a company, process, or product is compliant with the requirements of a particular standard.
